

# Concrete Intelligence

**28** Hours  
VS  
**Days**

Using Intercrete solutions you shorten concrete downtime to a fraction of standard concrete repair products

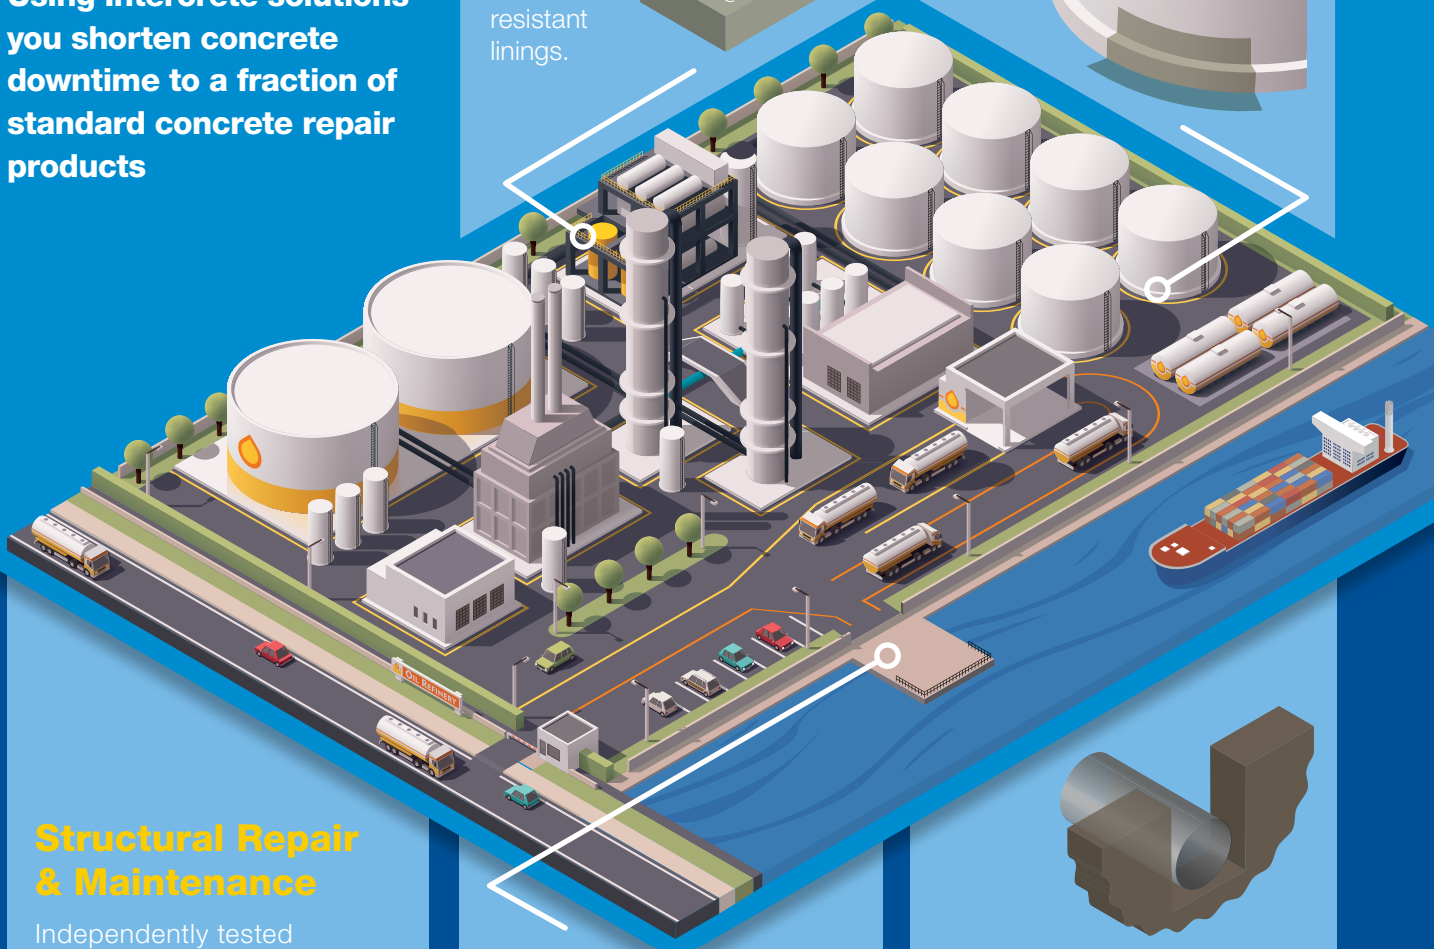

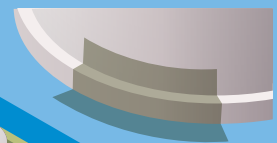

## Cargo Storage and Secondary Containment

Intercrete concrete sealers can be used to seal damp and green concrete to expedite the subsequent application of chemical resistant linings.

## Tank Base Sealing

Delivering flexible, effective protection against moisture ingress between storage tank chime and concrete plinth - preventing tank base corrosion failure and catastrophic underside cargo breaches.

## Structural Repair & Maintenance

Independently tested solutions delivering effective, fully waterproof repair and reinstatement of degraded and failing concrete structures for over 30 years. Restoring concrete cover to ensure long-term protection of concrete structure.

## Jetties and Tidal Areas

Rapid, long term protection for immersed assets applied on to unblasted steel – even in wet zone and tidal areas.

## Surface Tolerance

Can be used to seal continuously damp concrete below the water table for example, pits, sumps, trenches and drains as well as underground rooms.
